

The Second Galician-Portuguese Meeting of Biometry with applications to the Health Sciences, Ecology and Environmental Sciences will take place from 30th June till 2nd of July 2016, in the Faculty of Mathematics, at the [University of Santiago de Compostela](#) in Santiago de Compostela. The meeting is organized by the Portuguese Statistical Society ([SPE](#)) and by the Galician Society for the Advancement of Statistics and Operations Research ([SGAPEIO](#)), and follows on from the two meetings held in previous years by both societies:

- The [First Portuguese-Galician Meeting of Biometry \(EB2015\)](#) that took place from 14th till 16th of July 2013, in Braga (Portugal).
- The [First Portuguese-Galician Meeting on Ecological and Environmental Statistics \(EES2014\)](#) , that took place from 6th till 8th of November 2014, in Vila Real (Portugal).

This II Meeting of Biometry is directed to professionals and statisticians, academics, researchers and students (PhD and MSc). Its main objective is to disseminate the latest advances in the development and application of statistical and mathematical methods in Biology, Medicine, Ecology, Psychology, Pharmacology, Agriculture, Environment and other Health and Life Sciences.

The meeting programme includes 4 plenary sessions, 4 invited sessions and 1 round-table, oral and poster communication sessions, plus a short course on Survival Analysis.
